Career Objective

I will be graduating from Weltec with a Bachelor in Information Technology, majoring in Cyber Security at the end of April, I now seek to become part of a forward thinking, supportive organization who will help me grow.

An achievement I am proud of is having completed my Capstone Project with a final grade of 95%, which equates to an A+. The project gave me hands-on experience integrating the Llama 3 LLM into automated security workflows and required a strong ability to independently research unfamiliar technologies and apply findings to practical, real-world tasks.

Skills Summary

- Capable Independent researcher and an open-minded, fast learner
 - Experienced in Cybersecurity fundamentals: pentesting, incident response, Linux, virtualisation
 - Strong communication skills and ability to work independently or as part of a team
 - Great time management and reliable self-direction
 - Efficient task planning, organisation, and process implementation
 - High level of integrity and professionalism
-

Work Experience

Security Concierge – First Security

Oct 2021 – Present - Support customers and enforce safety and compliance at a high-security data centre. Provide relief coverage across multiple sites, adapting quickly to new environments. Digitised and reorganised 100+ induction records, improving workflow efficiency. Work collaboratively with teams and clients to maintain smooth operations.

Security Guard – ArmourGuard

Dec 2019 – Jan 2021 - Ensured safety and customer experience in a busy public space. Acted as primary contact for car park operations during peak periods. Supported and coordinated casual guards when required. De-escalated potentially volatile situations.

Crew Trainer – McDonald's

Jun 2016 – Mar 2019 - Trained new staff in kitchen operations and safety procedures. Provided reliable support during peak hours. Trusted trainer responsible for developing team capability.

Education

Weltec (2022 – 2025)

Bachelor of Information Technology – Cyber Security Major - Courses: Penetration Testing, Digital Forensics, Incident Response, Linux Admin, Network Security. - Capstone: Integrated Llama 3 with Python, Nmap, and virtual environments for automated analysis.

Level 5 Certificate in IT Technical Support

Hands-on experience with troubleshooting, system maintenance, and hardware/software configuration.

Level 4 Certificate in IT Essentials

Foundational knowledge of hardware, software, networking, and IT operations.

Technical Skills

Operating Systems & Virtualisation

- Linux (multiple distros), Windows
- Oracle VirtualBox, multi-VM networking

Cybersecurity & Networking

- Nmap, Metasploit, MSF Console, Kali Linux
- Digital forensics and incident response fundamentals

Programming

- Python 3, C#, C++

AI & Automation

- Llama 3 integration with Python and security tools

Software

- MS Office, LaTeX, Pandoc, MS SQL Server, GameMaker Studio, Wix
-

Interests

I enjoy trading card games, and co-op video gaming with friends. The trading card game has an element of strategy and gets me thinking about interactions and how to develop an effective solution against other decks. I also enjoy analyzing professional wrestling with my friends and attempting to predict what will happen.
